ABOUT ME

DevOps Engineer with a strong understanding of cloud computing, CI/CD automation, containerization, infrastructure as code, configuration management, and Linux administration. Motivated and focused on the smallest details. Skilled in designing, deploying, automating, and monitoring scalable applications using AWS, Docker, Kubernetes, Jenkins, Terraform, and Ansible. Passionate about implementing DevOps best practices, improving deployment efficiency, and maintaining secure, highly available infrastructure.

SKILLS

CLOUD PLATFORMS

- AWS

CI/CD TOOLS

- Jenkins

OPERATING SYSTEMS

- Linux

SCRIPTING

- Shell Scripting

CONTAINERIZATION

- Docker

ORCHESTRATION

- Kubernetes

VERSION CONTROL

- Git, GitHub

INFRASTRUCTURE AS CODE

- Terraform

PROGRAMMING LANGUAGE

- Python

CONFIGURATION MANAGEMENT

- Ansible

MONITORING TOOLS

- Prometheus, Grafana

CERTIFICATIONS

GUVI HCL

- DevOps Engineer

THINKBRIGHT EDTECH

- AWS Cloud Intern

LANGUAGES

- TAMIL
- ENGLISH
- TELUGU

EDUCATION

Jaya Engineering College

(2022- 2026)

Bachelor of Technology – Information Technology
CGPA: 8.5/10

ALAGAPPA SCHOOLS

(2020- 2022)

purasawalkam chennai 600084
SSLC 70 %

ALAGAPPA SCHOOLS

(2019- 2020)

purasawalkam chennai 600084
HSC 69 %

PROFESSIONAL EXPERIENCE

AWS Intern | ThinkBright EdTech

- Configured and deployed scalable application infrastructure on AWS EC2 using Auto Scaling and Elastic Load Balancing to ensure high availability.
- Designed and managed secure cloud infrastructure using VPC, subnets, security groups, IAM, and AWS monitoring services.

PROJECTS

End-to-End CI/CD Deployment on AWS EKS

- Deployed a React.js application on AWS EKS using Docker.
- Automated CI/CD using AWS Code Pipeline, Code Build, and Cloud Watch.

CI/CD Pipeline for Application Deployment

- Built a CI/CD pipeline using Jenkins, Docker, and Terraform.
- Deployed applications on Amazon EKS with Prometheus and Grafana monitoring.

Automated Application Deployment on AWS EC2

- Deployed a React.js application on AWS EC2 using Jenkins, Docker, and Docker Compose.
- Managed Docker images with Docker Hub and implemented monitoring using Prometheus and Grafana.

End-to-End CI/CD Pipeline for Java Application

- Built a CI/CD pipeline using GitHub, Jenkins, Maven, SonarQube, Trivy, Nexus, Docker, and AWS EKS.
- Automated build, testing, security scanning, containerization, and Kubernetes deployment.
